

PowerLift® Automated Rigging System

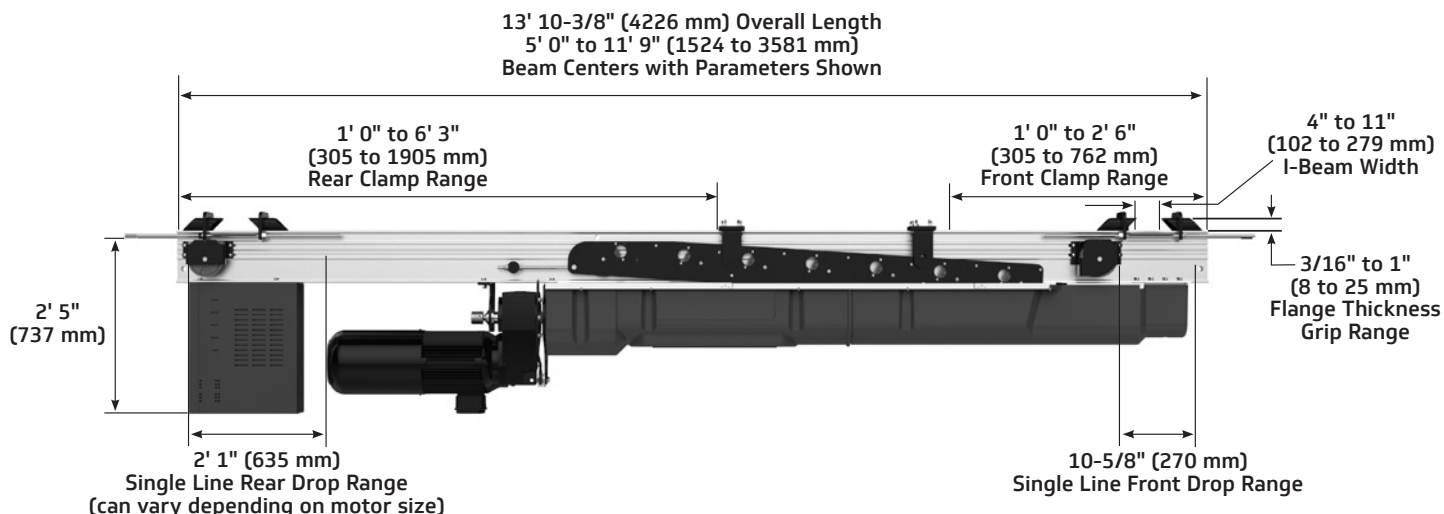

PowerLift is an economical, zero-fleet, high-performance, automated hoist available in fixed or variable speeds. Its versatile mounting system enables PowerLift to be installed in virtually any space. It's ideal for many stage hoisting applications.

- Load sensing standard with supporting control system
- Overload protection standard
- Position tracking standard
- Redundant limit switches standard (up, down, up overtravel, down overtravel)
- Dual brakes

Lift Lines and Travel

- Up to 62' (18.9 m) of travel with seven or fewer lift lines
- Up to 49' (14.9 m) of travel with eight lift lines
- One lift line can exit the hoist at the tail end of the hoist
- Optional continuous beam

Dimensions

Models

Part Number	Load Speed	Hoist Gross Capacity	Hoist Weight	Amp Draw		
				208 V	380 V	480 V
018-P0225F	20 fpm (0.1 m/s)	2500 lb (1134 kg)	670 lb (304 kg)	5.8	5.4	2.4
018-P0225V	0-20 fpm (0-0.1 m/s)	2500 lb (1134 kg)	670 lb (304 kg)	6.3	5.8	2.8
018-P1212V	0-120 fpm (0-0.6 m/s)	1200 lb (544 kg)	650 lb (295 kg)	16.5	8.8	7.5
018-P1217V	0-120 fpm (0-0.6 m/s)	1750 lb (793 kg)	710 lb (322 kg)	21.5	12.0	9.8
018-P1225V	0-120 fpm (0-0.6 m/s)	2500 lb (1134 kg)	800 lb (363 kg)	-	15.5	12.5
018-P1812V	0-180 fpm (0-0.9 m/s)	1200 lb (544 kg)	710 lb (322 kg)	22	12.5	9.8
018-P1817V	0-180 fpm (0-0.9 m/s)	1750 lb (793 kg)	750 lb (340 kg)	-	16	13

Center to Center Spacing Options

11" (279 mm) Set centers with all hoists adjacent to each other

8" (203 mm) Set centers with hoists offset

Loft Block Options

19 Series loft blocks –
underhung

Universal loft blocks –
upright or underhung

Continuous beam mounted loft blocks –
underhung

Batten Attachment Options

Trim Chain/Alpha
Chain

Pipe Clamp and
Turnbuckle

Batten Trim
Clamp

Batten Trim
Plate

Drum Cover Option

Required when hoist is within 106" (2692 mm) of a
walking surface or 60" (1524 mm) of a railing

Mounting Orientation Options

Upright

Underhung

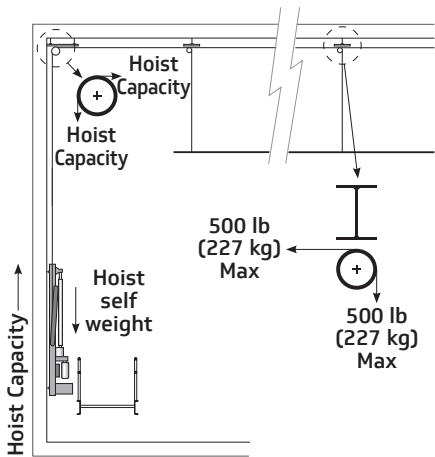

Vertical

Loading Information

The combined load on the lift lines associated with a single PowerLift hoist will not exceed the hoist capacity. Loads may be unevenly distributed on the batten with a maximum load of 500 lb (227 kg) on any individual lift line.

Calculating Live Load Capacity:

	Total hoist capacity:	
minus	Batten weight:	(3 lb/ft for each schedule 40 pipe batten and approximately 7 lb/ft for each connector strip)
minus	Pantograph weight:	(Approx 250 lb for 25' of travel and 350 lb for 50' of travel)
equals	Live Load Capacity:	Please contact your sales rep for additional configurations

Notes:

- Systems with 5 lift lines may need to be de-rated to 1750 lb (794 kg) in order to prevent overloading of a single lift line
- Systems with 4 lift lines may need to be de-rated to 1350 lb (612 kg) in order to prevent overloading of a single lift line
- Systems with 3 lift lines may need to be de-rated to 800 lb (363 kg) in order to prevent overloading of a single lift line

For minimum stacking height

We recommend that the closest contact point be at least 6" (154 mm) away from the nearest obstruction. Batten connection type, hoist location, loft block type, cable management and building architecture can impact stacking height.

PowerLift Riser — Typical

Warranty and Support

Three-Year Warranty against defects in materials or workmanship is provided on all J.R. Clancy equipment. Our warranty is contingent on operation by trained personnel and an annual equipment inspection of a J.R. Clancy authorized technician. 24/7 factory technical support with additional service and assistance provided by a worldwide network of J.R. Clancy authorized dealers.

Inspection and maintenance are available through J.R. Clancy's T.I.M.® (Training, Inspection, Maintenance) Program.
