SCENECONTROL® 24

JRCLANCY

## Unlimited Capacity to Transform Your Space

When you require motion control for a wide range of performances – from Broadway-style productions to complex music and dance concerts – the SceneControl 24 motion control system transforms your venue into a flexible, multi-purpose performance space. There's no limit to the number of shows you can program, or the number of cues per show, or even to the complexity of the cues.

SCENECONTROL® 24

Multiple Levels of Motion Control

Imagine having the ability to program many different moving elements within a single cue, while running several complex cues at the same time. The SceneControl 24 makes this vision a reality. With the SceneControl 24 you can program and save an entire season of rotating repertory or a recurring annual performance, and still have plenty of capacity for one-week or one-night productions.

- Run several cues simultaneously, even when they include groups.
- Create motion profiles based on time or speed.
- 10" touchscreen for quick and customizable access to presets, submasters and macros.
- 24" monitor for maximum information monitoring.
- Redundant processing.
- 3D wireframe visualization.
- 3D flight programming capabilities.
- Network multiple SceneControl consoles to allow multiple users to control specific stage elements.

Leading Safety Features

- The included Emergency Stop system can be upgraded to SIL3 rating.
- Illuminated GO and STOP buttons and function keys are hard-wired.
- The hold-to-run bar requires the operator to be at the console during motion.
- A Status/Alarm page immediately alerts you if a problem arises.
- System-critical actions are recorded and saved automatically in a time-stamped event log.
- Optional load sensing stops the load when it exceeds weight parameters.
- Unique user IDs and passwords give the ability to restrict functions and change user interface.

Additional Features

- 32GB free storage space on the hard drive.
- USB ports allow external network storage of show files.
- Full QWERTY keyboard for labeling cues.
- Choice of languages and Metric or Imperial units.
- Optional remote access for a service technician via a secure access device.
