

Vantis™ Pendant Controller

The Vantis Pendant Controller offers simple control of up to eight machines. Each machine can be programmed with up to six targets including upper, lower and four intermediate targets. Selection of multiple hoists or other machine types is easy as well as the ability to move them to a target together. Variable speed control lets you use this controller on drapery or scenery sets during production.

Applications

Venues with up to eight motorized machines that need the simplicity and mobility of a Pendant Controller and the ability to easily access and record targets.
