

INSTRUMENT STORAGE COMPARISON SHEET

UltraStor™ Instrument Storage Cabinets

Edge™ Instrument Storage System

DESIGN

- This solid cabinet construction utilizes a full back panel for a complete finished look. UltraStor™ Cabinets are designed specifically to accommodate and protect band/orchestra instruments and garments
- UltraStor Cabinets offer a wide variety of options to choose from to satisfy all your program needs
- Solid cabinet design allows for flush front installation which provides flexibility and accommodates a variety of cabinet depths

Back panels allow for front flush design and island configurations

- Edge™ Storage Systems are designed with open-back columns to create a built-in storage system. This system was designed specifically to accommodate and protect band/orchestra instruments and garments
- Multiple columns are available to aid in customizing your storage solutions
- Edge Storage Systems are Eco-friendly and constructed with fewer materials (no back panels). They utilize your existing wall and share panels between columns

No back panel saves material and cost

Column design hangs from bracket on wall making for easy install (shown without top panel)

Edge™ Instrument Storage System

SPACE REQUIREMENT

- Cabinet components are positioned side by side. Filler stripes are positioned between the cabinets to complete the fit and finish of the installation
- Cabinets feature end covers that are installed at the ends of the cabinet banks to cover exposed hardware and provide a finished look

- The Edge storage system feature a continuous design layout. Columns share side walls which reduce linear feet requirements
- Top and end panels enclose individual storage banks for a more complete finished look
- The continuous top panel provides strength and a sturdy top shelf for additional storage

DURABILITY AND STRENGTH

- Cabinets feature bolt-through construction. The hinges and lock assemblies are attached with bolts that run completely through the door and the cabinet side panel
- The durable shelves are designed to protect instruments and are constructed with tamper-resistant attachments
- Durable wear-resistant hardware. Heavy-duty strike plate ensures the tamper-resistant lock will close with continued precision. The durable slider mechanism secures the door and allows for padlock security
- Proven design and quality since 1989
- 10-year warranty

Solid, bolt-through construction

Durable, tamper-resistant shelves

Heavy-duty lock mechanism

- Edge hinges are attached to an aluminum extrusion for added strength as are the shelf supports which are bolted through the side panel
- Edge shelves are designed specifically to protect instruments and are constructed with tamper-resistant attachments
- Durable wear-resistant hardware. The hasp design allows for padlock security.
- 10-year warranty

Metal to metal hinge attachment

Durable, tamper-resistant shelves

System hangs from wall bracket

Heavy-duty lock mechanism
