

CLASSIC 50® MUSIC STAND

Traditional styling meets advanced construction.

The Classic 50® is the end result of half a century of experience with music educators just like you. By thoroughly investigating your day-to-day needs and recurring problems, we've been able to create a music stand that delivers traditional elegance without traditional headaches.

The Classic 50's superiority begins with its tough, lightweight construction. The special polymer material has an inherent tensile strength that withstands daily rigors without bending or denting like metal — and without creating a clatter. Add striking good looks and you have the most refined music stand ever designed, along with a stand that's tough enough to withstand years of use.

CLASSIC 50® MUSIC STAND

The unique recessed area prevents pencils and other ancillaries from flying off the desk when you turn the pages.

The desk is tightly secured to the stem but still allows an extremely fluid tilting motion and full-range of angles.

The wobble-free base is one more example of the Classic 50's quality, from top to bottom.

We tested Classic 50 against metal to see which would bend — and stay bent.

We wanted to see how the Classic 50 and a metal stand would compare when subjected to identical sustained pressure.

As you can see, there is no comparison. The Classic 50 bounces back into shape, while metal stays permanently bent.

Two options for the easy, stable transport of your Classic 50 Music Stands.
