

FLEX™ CONDUCTOR'S SYSTEM COMPONENTS

The Flex Stand can be used with the entire system or by itself.

HPL Desk

Polycarbonate Desk

A flexible conductor's system that you configure

Now you can build the perfect conductor's environment for the way you want to teach, and not just once but whenever your needs change. This brilliant Wenger system adapts to your height, habits, and imagination. It also gives you the freedom to choose only the elements you want to customize the system your way.

Flex is a harmonious design where all elements work together. It starts with the large, sturdy conductor's stand that adjusts to virtually any position you need. From here you can add our innovative TechBridges in custom lengths with snap-on attachments for MIDI keyboards, laptops, a workspace and even a drink holder – and each easily positions right where you want it. Couple these with our sturdy, highly mobile two-step podium and comfortable, adjustable pneumatic chair. But more than that there's the ability to make this system your own, for your specific needs.

FLEX™ CONDUCTOR'S SYSTEM COMPONENTS

Put your keyboards right at your fingertips. The laptop mount accessory adjusts to your preferred angle. And a built in fan keeps the base cool. MIDI keyboards – even full size ones – can rest stably on the keyboard mounts.

Patent-pending mount clip and vinyl covered steel flex arm work together to enable the perfect positioning of an iPad or iPad 2.

Customize the length of your TechBridge. With sizes ranging from 2' (61 cm) to 8' (2.4 m) you can really stretch out.

Clamp on a desktop work surface wherever you like. It's perfect for ipods, mixers, microphones, music books, speakers...

Don't leave your laptop at your desk. Have it within easy reach on our tiltable attachment.

The centerpiece of the new Flex Conductor's System is the stand itself. It's large, more versatile and rotates, tilts and swivels right where you like it.

MIDI keyboards rest comfortably on the TechBridges. The special keyboard mounts hold most sizes of electronic keyboards.

Customize the length of your TechBridge with bridge lengths of 2'-8'.

The TechBridges swivel to just about any angle, allowing you to customize your conducting space.

Is it sturdy? You bet. Heavy, cast iron footings give it a confident foundation.

Set the perfect height for you and then tighten it in place.

The core products in our Conductor's System include the stand, chair and podium.

PRODUCT SPECIFICATIONS:

- A customizable system that allows the conductor to create a personal workspace perfect for his or her own needs
- TechBridges connect to the stand and allow the user to add various tools to the system
