

HYDRATE CART™

Invest in performance for years to come.

Like all GearBoss products, we bring you the best and the Hydrate Cart is no exception. The Hydrate Cart addresses all of the critical issues to bring you a system with unmatched performance, durability and value.

- Heavy-duty construction sets the Hydrate Cart apart. The robust aluminum frame is guaranteed for 5 years and is virtually indestructible.
- The bottom-draining valve ensures that no fluid is left in the tank after draining.
- Heavily reinforced hitch.
- Dual pumps and quick-release tubes.
- Fast service on any parts to keep you up and running.

Keep athletes hydrated, safe and at peak performance while reducing program liabilities and getting rid of unsanitary bottles and coolers.

GEARBOSS®
by Wenger®

Features

- Aluminum frame with a 5-year warranty – virtually indestructible
- 32" wide x 42" long
- 50 gallon, FDA-approved tank
- 8 drinking stations– 4 per pump keeps pressure strong
- Quick-release, FDA-approved hoses & fixtures
- Large, sealed-bearing turf tires
- Bottom-draining valve
- Full weight is 650 lbs, empty weight is 205 lbs

Mobility

Either pull manually through doors and hallways or hook the Hydrate Cart up to a tractor using the heavy-duty pin-hitch for easy maneuverability.

Nozzle Flow

The wide nozzle creates a flow like that of a water fountain, allowing athletes quick and satisfying water breaks.

Pumps/Battery

The Hydrate Cart uses 2, FDA-approved SHURflo® pumps that are powered by a large 12 volt 33 amp sealed fiber-mat battery for extended use. Simply use the quick-connect located on the front of the machine to recharge the battery. Under normal use (2-3 hours a day), it should last at least a week.

Easy Filling & Draining

With a large opening on top of the 50 gallon tank, the Hydrate Cart is easily filled using a hose. A 1/4 turn of the ball valve located on the bottom of the tank will drain the tank quickly and completely.
