

Portable Disability Ramp

- Ramp sections use standard 4' (122 cm) wide Versalite Platforms. If you already have a Versalite Platform System, you can use your existing decks with the Disability Ramp frame, or you can use the decks purchased with your ramp system to create flat staging.
- Ramp design allows for different ramp configurations depending upon your needs.
- Ramp design meets all guidelines of the Americans with Disabilities Act (ADA) including ramp slope, hand rails, and landings.
- Compact storage is ideal for facilities that have limited storage space.
- Standard adapters allow the ramp to be used with any type of Wenger portable staging. Custom adapters are available for other types of staging, both portable and permanent.
