

THEATRE AND STAGE EQUIPMENT

SOLUTIONS FOR AUDITORIUMS AND PERFORMANCE

Music and performance areas are among the most unique and difficult spaces in a facility. Based on 60 years of studying these spaces and supporting those who use them, Wenger Corporation has emerged as the world's leading resource for products, equipment and consultation.

Diva® Acoustical Shells

Dramatically improve acoustics while adding impressive visual elements to complement your architecture. With standard or custom-built designs in a broad range of materials, sizes and styles.

Forte™ Acoustical Shell

The ideal solution for full-stage acoustics in small-to-medium size performance spaces including auditoriums, recital halls and theatre venues.

Legacy® Acoustical Shells

Attractive and extremely portable, Wenger Legacy acoustical shells are easy to move and set up by just one person.

Acoustical Clouds and Acoustical Panels

Overhead Acoustical Clouds and wall-mounted Acoustical Panels enhance the listening experience by optimizing sound in any rehearsal or performance space.

STRATA® Pit Filler

This clean design goes up quickly and easily thanks to a straightforward column-beam system. All it takes is a small crew and one tool — a hex-key that locks decks in place. Wenger is ready to design your pit filler for a custom fit to the radius of your stage, depth of your pit and aesthetics of your design.

Studio® Makeup Station

Wenger's Studio Makeup Stations has large mirrors, plenty of untainted, shadow-free light, handy shelf space and a sturdy steel frame. Wall mounting bracket has multiple holes for alignment with wall frame studs. Also mounts to masonry walls.

Upper Deck Audience Seating® Tiered Risers

The most innovative solution to adding large-capacity audience seating with minimal effort and time. A crew of four can set up seating for 200 in under two hours. A wide variety of configurations are available to best fit the designs of your space.

With its fold-out frame, Upper Deck doesn't have to be completely disassembled to take it down. Just remove the decks and rails and fold it flat against the wall.

Corner sections not only allow you to create aisles for access to an entry and exit door, but they let you have 45 degree or 90 degree angles to maximize seating and improve sightlines.

Columns, endframes, and trusses lock together to create a sturdy, quiet structure. All components connect quickly and securely without tools.

Backrails and endrails also attach quickly and securely with their own integrated locking system. Both rails meet all applicable building code standards.

Series 100
The most economical solution for fixed audience seating that combines lasting comfort with attractive styling.

Series 200
Handcrafted seats with fine wood finishes and premium fabrics.

Series 300
Handcrafted with fine wood finishes and premium fabrics like the Series 200 but includes a pedestal base for HVAC installations.

Fixed Audience Chairs
Wenger Corporation Fixed Audience Seating is designed with an extremely efficient and quiet lifting mechanism that eliminates noise. Handcrafted and ergonomically designed with lumbar support for lasting quality and superior comfort.

Portable Audience Chairs

Portable Audience Chairs combine the elegance of high-end permanent seating with the versatility of a folding chair. Available in a wide variety of configurations, colors (64 fabric colors) and sizes.

High-Density Portable Audience Chairs by Clarin®

This folding portable audience seating won't leave marks on gymnasium or auditorium floors. The special X-frame construction prolongs the life of the chair and provides even weight distribution for enhanced comfort. The exclusive Duraflex action assures level seating on uneven surfaces — and the chair frame automatically returns to its original shape.

PLATFORMS

Whether it's a basic portable stage or a multifaceted staging system that can be set up in a vast array of configurations, Wenger has the perfect staging solution to accommodate any application.

Versalite® Staging

As the name implies, Versalite provides the freedom to create multi-use, multi-level stages and platform systems in virtually any configuration.

Trouper® Staging

Trouper is the ideal solution for facilities that require a strong simple staging system that doesn't need to be reconfigured often.

Showmaster® Staging

Showmaster combines heavy-duty staging with rock-solid stability, incredible versatility and fast setup.

STRATA® Event Staging

Engineered to adjust to any surface, STRATA is the perfect event solution whether it's an elegant ceremony or a casual gathering.

Vision® Event Platforms

Vision is the pinnacle of high-performance staging with brushed machined aluminum and clean simple lines for a high-tech appearance.
