

Value Tack Board

- Value Tack Board is made from high quality, finely grained 100% natural cork, making it both durable and resilient.
- Framed in anodized aluminum, the surface consists of 1/16" thick layer of natural cork bonded to a 3/8" thick layer of insulation board.
- Natural cork boards are also environmentally responsible. Cork is harvested from cork trees that are stripped of their bark when they are 15 to 20 years old. Cuts are made carefully so as not to harm the inner core of the tree. The cork bark regrows, and this process allows a useful life of more than 150 years for each tree.
