MAESTRO® ACOUSTICAL SHELL SYSTEM

Ferguson Center for the Arts,
Christopher Newport University,
Newport, Virginia

Gangdong Arts Center, Seoul, South Korea

A COST-EFFECTIVE ACOUSTICAL SHELL

Maestro ceiling panels complete your full shell by providing critical acoustic and aesthetic elements. They prevent sound from getting lost in the fly loft. Maestro ceilings also create a complete aesthetic appearance. Optional integrated lighting provides uniform lighting throughout the shell. Maestro ceilings are suspended from typical stage rigging systems.

Lewisville Center for the Creative Arts, Lewisville, Texas

A COST-EFFECTIVE SOLUTION PACKED WITH FEATURES, CONVENIENCES AND PERFORMANCE AESTHETICS FOR YOUR VENUE

The Maestro lives up to its name, delivering impressive full-stage acoustics, while creating live entertainment environments for performances at an affordable price.

- ✓ **Easy Setup** – Maestro is easy to set up with a crew of three people.
- ✓ **Flexibility** – Easily reconfigure Maestro to accommodate groups of varying sizes.
- ✓ **Stability** – Wall towers are counterweighted to ensure superior stability and safety.
- ✓ **Space-Saving Design** – Individual towers nest together when not in use, saving precious back-stage space.
- ✓ **Cost Effective** – Maestro is an affordable full-stage shell system for any performance space.

SOLUTION FOR ANY PERFORMANCE SPACE

“The users of the shell, both the audience and the performers, have found the visual and acoustical results to be superb! The audience is hearing the Duluth-Superior Symphony Orchestra like they never have before.

The orchestra is benefiting from finally properly hearing themselves perform, and the Maestro is enjoying the ability to help his orchestra reach their full potential. A whole new world of possibilities exists for what the DSSO can do in their performances.”

Brian D. Morse AIA
SJA Architects

“The Maestro Acoustical Shell is a wonderful addition to the Pavilion’s Great Hall. The shell looks great and sounds superb. It is well designed and engineered, allowing for easy setup in a variety of layout configurations. Thanks for a job well done.”

Terence L. Ross
Technical Director,
Washington Pavilion of Arts and Sciences,
Sioux Falls, South Dakota

CONSTRUCTION

- The Maestro® is a cost-effective solution for any performance space requiring an acoustical enhancement.
- Finishes available include:
 - Low Pressure Laminate with black painted aluminum panel edges
 - Hardwood Veneer stained and finished to match space requirements
 - Painted panel finish ready for a show
- Side towers for stage access for musicians and performers.
- Shell towers are easily moved into performance position and moved back into storage via the Wenger Corporation wheeled tower mover. Mover is designed for easy transport of towers without marring stage floor. Towers nest together to reduce storage space required.
- Ceiling panels set up with a crew of as few as two people.
- Ceiling panels with optional integrated light fixtures feature tilt switches making storing the ceilings fool proof. Lighting will not turn on while in storage.
- Incandescent and LED lighting options available.
- Ceiling panels store easily in rigging fly loft for storage. Ceiling panels are adjustable in performance position. No tools are required to tilt ceilings.
- Panels are constructed with black aluminum edging, a rigid honeycomb interior, and a hard panel skin for superior sound quality and durability.
