

## STUDIO® MAKEUP STATION

Wenger®

### The best place to put on your best face.

Untainted shadow-free light, large mirrors, plenty of counter and storage space - all the things you want and need to put on your best face for each and every performance.

Illumination from a total of nine bulbs in wire cages on the 36" (914 mm) model and 8 bulbs on the 30" (762 mm) model combined with reflected light from the counter and overhead shelf creates exceptional untainted shadow-free light. And the unique design allows for a shared column of lights between adjacent makeup stations.

The large mirror provides a full, unobstructed view of head and shoulders and the steel laminated construction keeps the mirror flat and true while preventing it from splintering if accidentally damaged. The 36" (914 mm) model comes with a convenient tackboard for attaching makeup designs, notes, and schedules.

The distinctive concave counter shape lets you lean into the mirror for highly detailed makeup applications with plenty of space for makeup, hairdryers, wig stands and other accessories. The laminate overlay is highly resistant to stains from makeup and cleans easily. And the high weight capacity withstands heavy loads.

Studio makeup stations come with built-in power outlets, an overhead shelf for props and supplies and an optional under-counter cage or sliding drawer for additional storage. And unlike custom built makeup stations that require costly carpentry and electrical work, Wenger Corporation Studio makeup stations are ready to be wall-mounted and hard-wired.

The Studio makeup station from Wenger Corporation - As committed to the quality of our products as you are to your craft.

# STUDIO<sup>®</sup> MAKEUP STATION

The makeup station's steel frame easily mounts to an adjustable wall bracket (shown in black).

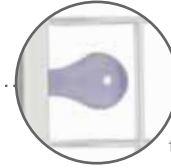

A rocker type light switch and 20 amp duplex outlet with built-in GFCI protection is mounted on the lower right side of the mirror frame.

An integral molded-in pencil tray keeps small items from rolling.

An overhead shelf improves lighting by reflecting untainted light in addition to providing storage for props and supplies.

Openings in the cages allow for bulb removal and installation without removing the cages.

An optional under-counter cage provides convenient storage space. Available on 36" (914 mm) model only.

An optional lockable sliding drawer for storage and securing of valuable items. Available on 36" (914 mm) model only.

## PRODUCT SPECIFICATIONS:

- Wall mounting bracket has multiple holes for alignment with wall frame studs or mounts to masonry walls.
- Makeup stations can be installed at any height - recommended height for counter is 29" (737 mm) from the floor.
- Designed for a maximum 60 watt incandescent or 15 watt swirl fluorescent bulbs (bulbs not included).
