

Your Performance Partner

SHOWMASTER®

A solid foundation for great events.

Production professionals know Showmaster Staging for its rock-solid stability, incredible versatility, easy set up and lasting durability. When it comes to heavy-duty staging, Showmaster is the foundation that makes great events possible.

The all-in-one design of Showmaster ensures faster setups, smaller crews and fewer mistakes. All of the parts are integral to the deck so there are no loose parts, no frames to assemble and no tools to slow you down. Just adjust the legs and tip each deck into place.

1. Roll into position, unfold and adjust.

Just wheel the storage cart where you want it, unfold the legs, lock them in place and adjust to the correct height. Color-coded adjustment holes at 4" increments ensure quick, at-a-glance height adjustments.

3. Connect.

Each unit locks tightly together, forming a stable and seamless performance surface. The patented steel-frame channel connectors lock together quickly and easily.

2. Tip and place.

After legs are properly adjusted, simply tip the stage section off the cart. The easy tip-and-place setup eliminates heavy lifting. And after you place the four-legged core unit, additional units have just two legs, cutting leveling time in half.

4. Tear down and store.

Take down is just as easy and storage couldn't be more convenient. Space-saving stack-and-store carts store a 40' x 60' stage in a 15' x 30' space, and the all-in-one design is built for speed and ensures no lost parts.

SHOWMASTER SPECIFICATIONS:

- Live-load rating of 200 pounds per square foot (976 kilos per square meter).
- Height of platforms available from 30" - 56" (76 cm - 142 cm) and 48" - 88" (122 cm - 223 cm) adjustable legs.
