

GearBoss® Closures & Bypass Doors Accessories

GearBoss is an equipment storage and transportation solution designed to transform your equipment room into a point of pride. GearBoss is a high-density storage solution that uses an innovative system of tracks and rolling carts and accessories to reduce the square footage of your storage area by at least half. GearBoss units are designed to encourage airflow and improve sanitation and odor issues. The modular system features accessories specific for the needs of bulky equipment like helmets and shoulder pads. Accessories like panels and doors can be added for security, and in matching school colors they present an unmistakable message of program pride. All closures and doors have a ten-year warranty.

Intended Use

- The GearBoss end closures, side closures and bypass door accessories are intended for indoor use in normal ambient temperature and humidity conditions—they must not be exposed to prolonged outside weather conditions
- The GearBoss end closures, side closures and bypass door accessories are intended to be used by the customer to accessorize their GearBoss carts and to add levels of security and aesthetic finish
