

The GearBoss Advantage:

GearBoss hockey lockers don't just make your locker room look great, they also have features that make them exceptional from a practical standpoint as well:

Antimicrobial Surfaces
All GearBoss lockers are treated with an antimicrobial finish to reduce the spread of viruses. Lockers are also designed to be more easily cleanable.

Superior Airflow

Packing sweaty gear into a stuffy locker is a recipe for breeding mold, mildew, bacteria and the MRSA virus. Gearboss' vented doors and optional fan systems dry out player gear in a hurry – and reduce odors.

Added Security

Expensive equipment and player's personal property are tempting to thieves – especially in an unlocked locker room. GearBoss has many options for lockable cubbies within each player locker.

Improved Organization

An organized locker room means less misplacement of gear. GearBoss lockers promote organization by having dedicated shelves, hooks and pockets for each piece of gear.

Team Pride

Team pride is important to your program's success. Using team colors and logos in your locker design has a positive impact on players, boosters and more.

"The ease of working with GearBoss was tremendous. We were very picky, making a multitude of changes, and GearBoss gave us exactly what we wanted. We're extremely satisfied. GearBoss gave us a great proposal – very cost-efficient and very high quality."

– Brad Frost, Women's Hockey Coach, University of Minnesota

CUSTOM HOCKEY LOCKERS

Construction:

- Durable 3/4" (19 mm) thermofused composite wood core built to survive repeated rugged use in hardcore environments
- Modularity means you can make unlikely replacements without breaking glues, dowels, or adjacent components
- Integrated bench seating eliminates the need for floor-mounted benches or folding chairs
- Open design promotes airflow to encourage drying and reduce mildew and odor buildup

- Antimicrobial laminates use nano-silver technology that lasts the life of the product and creates a hostile, lethal surface for bacteria, viruses, mold, and mildew
- Heavy-duty PVC edge banding maintains the integrity of the laminate surface and prevents chipping and separation

Options:

- Lockable cubby; additional storage cubbies; full electronics, including lighted name plate and duplex outlet; programmable digital lock; footlocker drying racks; skate drawers or hooks; breezers, gloves and pads drawers; backlit footlocker fans; hooks and garment bar configurations; more than one thousand ultimate configurations and the ability to match the entire system to your school's colors and branding.

CUSTOM HOCKEY LOCKERS

GearBoss lockers create a team room like no other.

When it comes to building and maintaining a powerhouse tradition, everything matters. Attracting the staff, coaches and athletes that can take your program to the next level is a constant focus. Your facilities reflect tradition and the expectation for the future, and there is one area that will impact your players every day – the team room. The team room has evolved to be so much more than a locker room. It has to make a statement of excellence. It has to recruit. It has to function. Your team room has to be a space that is one of a kind where the foundation of your team can grow deeper. GearBoss lockers, along with your facility designs, will make a first-class statement that will set your program apart.

CASE STUDY: LAKESHORE ACADEMY

To create a better storage solution for each piece of hockey gear, Lakeshore Academy's custom lockers were built on innovative concepts GearBoss developed with Western Michigan University. The ultimate goal was to store gear in an organized, aesthetic way that reduced visual clutter. A highly collaborative design process between a visionary project designer and GearBoss created a functionally superior locker that is aesthetically unique and integrated into the team room.

"The GearBoss hockey locker is revolutionary – there's nothing else like it! I gave input during the conceptual design and watched GearBoss transform ideas into reality. Hockey lockers have been stagnant for many years; this is the first real change I've seen."

- Dion VanAtter, Former Hockey Equipment Manager
Western Michigan University

GEARBOSS®

GearBoss makes creating a hockey locker that's unique to your program easy. We'll work with your team to understand your needs and your budget to design a locker that stands out (and stands the test of time). Here are two recent examples of projects that highlight our capabilities. And because these are "custom" we can do just about anything you can dream up – just ask!

CASE STUDY: UNIVERSITY OF MINNESOTA

To update its women's hockey locker room, the University of Minnesota looked to GearBoss, which had already built custom lockers for other 'U' teams, including football.

GearBoss provided a cost-effective proposal and worked with 'U' personnel in accommodating design requests and developing custom features that balance practicality and aesthetics. The new oval locker arrangement required precise engineering and installation.

"We worked closely with the GearBoss team in tweaking the hockey locker design. We never got any pushback – they were always very open to what we wanted."

- Clay DeHaan, Project Manager,
University of Minnesota

"GearBoss helped us design a real cool hockey locker that's very practical yet looks just incredible with all its different features. It was a great experience."

- Brad Frost, Women's Hockey Coach, University of Minnesota
