

Cable Pantographs

JR Clancy's Pantograph provides a reliable space saving way to provide power to moving pipe battens. The lightweight aluminum frame houses both high voltage power and low voltage data cables in separated channels. Whether front of house, over stage, or in the lobby the JR Clancy Pantograph is the easiest and cleanest cable management system available.

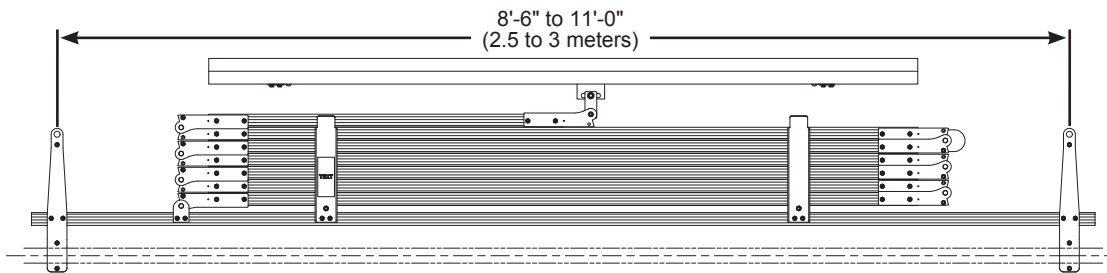

Features and Benefits

- National Electric Code Compliant Grounding System – JR Clancy's Pantograph provides one 12-gauge ground conductor for every two 20 amp circuits in compliance with NEC.
- Fits between two lift lines spaced 8'-6" to 11'-0" (2.5 to 3 meters).
- Units can be mounted to the underside of building steel or hoist backbone.
- Up to 50' (15 meters) vertical travel.
- Up to twenty five electrical power circuits.
- Up to two data cables.
 - CAT 5 or DMX standard, other options available.
- High/low voltage barrier.
- Mounts to standard 1-1/2" pipe batten.
- Black powder-coat paint finish.
- Stacks in 25" (63 cm) or less.
- Hoist speeds up to 30 FPM.
- Connector strips are also available.
