

PowerLine™

Shaft Hoist

PowerLine is a line shaft hoist, re-imagined to reduce size, weight, and cost. PowerLine hoists offer a wide range of speeds and capacities, making them versatile performers and excellent choices for retrofits in older buildings. Among its many uses are electric sets, scenery and curtains, and front-of-house lighting sets.

Capability

- Speed: Up to 240 fpm (1.2 m/s)
- Travel: Up to 60 ft. (18.3 m)
- Capacity: Up to 2,500 lb (1184 kg)
- Max batten length: As required
- Custom speeds and capacities available

Features

- Customizable line shaft design that is strong, efficient and versatile
- Fixed or variable speed options to meet your performance needs.
- Compact unit doesn't require wall or wing space and can be mounted upright or underhung on 10" (254 mm) spacing.
- Simple construction places only vertical loads on the supporting structure without lateral loads.
- Easy to install backbone can be continuous/ discontinuous to meet your site conditions.
- Universal joints in the drive shaft promote long life and reliability by allowing various building steel configurations.
- Compact drum fits over standard 10" (254 mm) grid well.
- Helical/worm or helical/bevel gear boxes can be oriented four ways for simple installation in any space.
- Flexible installation — standard hoists can be mounted from beams with flanges from 4 - 11" (102 - 279 mm) wide and from 1/4 - 1" (6.3 - 25 mm) thick. Custom mounting hardware can be provided if needed.

Dimensions

PowerLines are built to meet your requirements so dimensions will vary. Contact us for more details.

- 6 or 8" (152 or 203 mm) welded steel drums offer a wide range of speeds and capacity options to meet your performance requirements.
- Versatile mounting clamps attach to steel that is parallel or perpendicular to the hoist for fast, easy installation without welding.
- High-efficiency green motors meet IEC 60034-30 Efficiency Classes standard.

Safety

- **Designed and manufactured by J.R. Clancy**, a company with over 130 years of rigging expertise.
- **“Fail-safe” motor brakes** are spring applied and electrically released.
- **Emergency-stop system** meets NFPA 79 (Electrical Standard for Industrial Machinery) with ramped stops for high speed equipment to reduce mechanical shock loads.
- **Two levels of limit switches** with normal travel and over travel switches using separate, redundant circuits for added safety.
- **Hold-to-run controls** require an operator to be present when movement is taking place in conformance with NFPA 79.
- **Touch safe** interior of all electrical enclosures guards to prevent contact with live components, per IEC 204-1 Protection.

Options

- Cross groove and slack line detectors
- Load cells
- Position encoder
- Additional limit switches
- Overspeed or electric secondary brake

Control Options

- PowerLine works with the entire range of J.R. Clancy automation consoles or push button controls. It can also interface with any modern control system.

Batten Termination Options

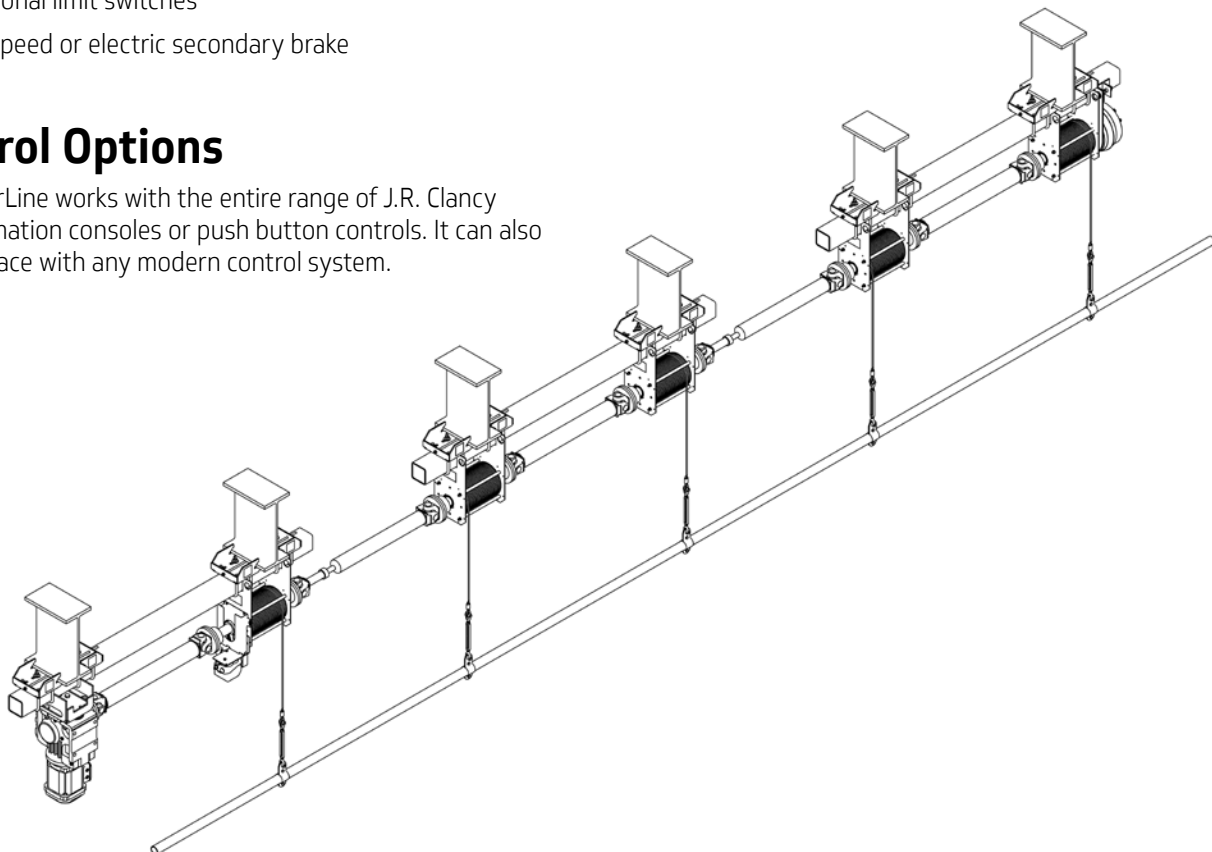

- Trim chain
- Pipe clamp and turnbuckle
- Batten trim plate
- Batten trim clamp

Batten Options

- 1.5" (48 mm) Schedule 40 batten
- 1.5" (48 mm) Schedule 80 batten
- 1.5" (48 mm) Schedule 40 truss batten

Mounting Configurations

- Motor on one end, brake on the opposite
- Motor in the middle, brake on each end
- Motor on each end

Rigging Loads

LOADING NOTES:

- P (DRUM LINE LOAD) = 0 TO 500 LB (225 KG)
- T (HOIST TORQUE) = SEE TABLE 1
- (STALLING TORQUE) = SEE TABLE 1
- W (HOIST WEIGHT) = MOTOR ASSEMBLY (SEE TABLE 1)
 - + BACKBONE (12.5 LB/FT [1.73 KG/M])
 - + DRIVE SHAFT (SEE TABLE 1)
 - + DRUM ASSEMBLY (75 LB [34 KG] EACH)
 - + BRAKE (100 LB [45 KG] EACH)

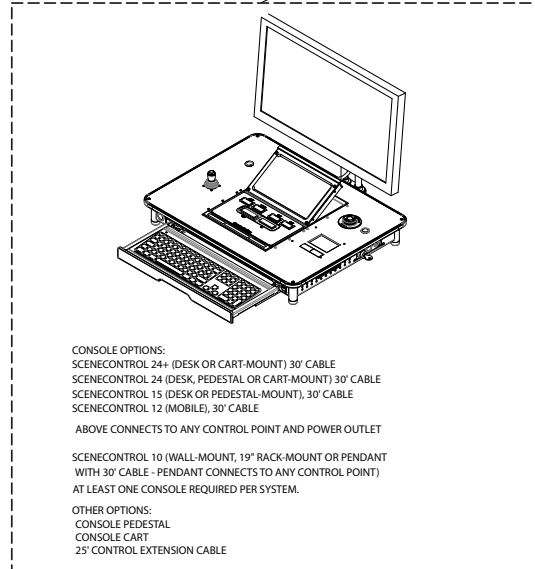

1. SET CAPACITY = SEE TABLE 1
2. TOTAL LINE LOAD ON ALL DRUMS NOT TO EXCEED THE SET CAPACITY.
3. LINE LOAD ON EACH DRUM NOT TO EXCEED DRUM CAPACITY (P).

Warranty and Support

Three-Year Warranty against defects in materials or workmanship is provided on all J.R. Clancy equipment. Our warranty is contingent on operation by trained personnel and an annual equipment inspection of a J.R. Clancy authorized technician.

24/7 factory technical support with additional service and assistance provided by a worldwide network of J.R. Clancy authorized dealers.

Inspection and maintenance are available through J.R. Clancy's T.I.M.® (Training, Inspection, Maintenance) Program.

Ordering Information

PowerLine is available in several standard configurations or can be customized to your needs. Contact Clancy to discuss optimal configurations or custom solutions.
