SCENECONTROL® 15

JRCLANCY

The Easy to Use, All-Purpose Motion Control System

Create exciting scene changes and dramatic visual effects with the SceneControl 15 console. This compact, mid-level motion control system is feature-packed and can control stage machinery, automated rigging, turntables and more in venues of any size.

Unlimited Cueing and Grouping

No matter how many scene changes and effects a show requires, the SceneControl 15 console takes on the challenge. There is virtually no limit to the number of cues per show, or the number of shows you can create. With 48 different axes, operators have plenty of capacity for complex moves onstage, even when several moves take place at the same time. Operators can keep a close eye on everything in motion using the 3D wireframe view of the performer space and axes.

- Control up to 48 axes/hoists.
- Get fast access to every cue using the 15" touchscreen.
- Run several cues simultaneously, even when they include groups.
- Create motion profiles based on time or speed.
- Unlimited programming of shows and unlimited numbers of cues per show.

SCENECONTROL® 15

Enhanced Safety Features

Our state-of-the-art algorithms allow operators to define safety zones around equipment. Multi-level security includes user IDs and passwords, as well as four user levels to restrict functions to appropriate operators.

- Emergency stop operator.
- Included Emergency Stop system can be upgraded to SIL3 rating
- Illuminated Go and Stop buttons are hard-wired and are not part of the touchscreen.
- Hold-to-Run bar requires the operator to be at the console during motion.
- System-critical actions are recorded and saved automatically in a time-stamped event log.
- Optional load sensing stops the load when it exceeds weight parameters.

Additional Features

- Full QWERTY keyboard.
- Integrated 3D wireframe viewing.
- Single joystick for axis jogging.
- Full QWERTY keyboard.
- Multi-language capability supports English and two other languages.
- External USB ports for copying files or connecting approved input deices.
- Optional remote access to a service technician via a secure access device.
- 32GB had drive.
- Networks with other J.R. Clancy motion controllers.
