EQUIPMENT SANITATION STARTS WITH GEARBOSS

MRSA virus, mold, mildew, bacteria and staph issues can be a burden on your program. Most products claiming to solve the problems, only mask the symptoms. GearBoss by Wenger starts the fundamental first step to a solution, an organized, clean and cleanable room.

- Achieve high density storage without losing critical air flow
- Mobile system allows for cleaning around and under carts
- Carts and shelves assist you in organizing critical pieces of equipment like helmets, jerseys and warm-ups into a specified cleaning rotation
- Security doors and closures are designed to create gaps that allow airflow, while ensuring your equipment is safe and secure

Face it, if your living room smelled like your locker room, you would find a solution - odor is a sign of a problem. Let us assist you today in creating the right athletic space for your needs and eliminate costly sanitation issues.

"I like the GearBoss system. We need spaces that are clean and are easy to keep clean. Spaces that promote organization and airflow are the first step to winning the sanitation war. The odor isn't gone, but i am very surprised at how much of a difference this system makes."

- Terry (T.C.) Carlyle, Athletic Trainer
Owatonna School District
Owatonna, MN
