

# GEARBOSS® SHELVING

## **The Most Flexible and Durable Adjustable Height Shelving Solution Available.**

This shelving system is designed specifically for your athletic equipment, phy. ed. and activity storage needs. GearBoss Shelving will help you win the constant struggle to protect your investment in equipment and to keep your storage areas organized and accessible.

Each GearBoss Shelving system will be configured by your sales representative to meet your needs. And as those needs change, the flexibility of moving shelves quickly and without tools is critical. The cantilever design means that you can optimize overhead space while keeping the floor open and free from supports and uprights. More shelves and options for hanging bars and lock boxes can be added at any time. Work surfaces can be added to create repair benches, pass-through stations and even desks. When used in conjunction with GearBoss SportCarts™ (shown above) you can add another dimension of mobility and security to your storage area.

GearBoss Shelving gives you an aesthetically sharp, flexible and durable solution that delivers value well beyond the limitations of lumber or the light-duty systems from the big-box retailers.

# GEARBOSS® SHELVING

(shown with GearBoss SportCart™)

Stores 96 helmets

Stores 48 Shoulder Pads

"These shelves are a great addition to our GearBoss system. They have enabled me to store our entire football helmet inventory in one small closet."

- Brian Gordon  
Director of Equipment  
North Dakota State University

## MANY SPECIALIZED FEATURES

- Available in bays 4' wide by 8' high (1219 x 2438 mm)
- 2" (51 mm) square 12-gauge steel uprights mount to floor and most walls including sheetrock and stud, block and concrete
