

MUSICIAN CHAIR

Perfect posture with added comfort.

Helping musicians maintain posture is an endless task. And, rather than help you succeed, most chairs promote slouching. But Wenger's Posture Chair design actually duplicates the benefits of standing posture in a seated position.

The Wenger Musician Chair offers advanced students and serious musicians padded comfort for grueling practice and performance schedules. And the attractive appearance adds a refined look on any stage or rehearsal room.

MUSICIAN CHAIR

Wenger's Posture Chair design.

The problem with common chairs.

In a standing position, your rib cage is expanded for maximum breath intake. Your diaphragm is unconstricted for greater breath support. Your hips are rotated forward, allowing your back to follow its natural, supportive lumbar curve. The result is the ideal posture for singing or playing an instrument.

But sit in any nonposture chair and your body's immediate reaction is to slouch. When you sit back your spine is forced out of its natural supportive position. This forces your body down, lowering your rib cage and constricting your diaphragm. To compensate for this discomfort and lack of support, you move to the edge of the seat. You'll continue this cycle as long as you're seated, bringing on rapid fatigue and making it difficult to focus on technique.

The Wenger Solution: Posture Chairs

Sit in a Wenger Musician Chair, one of our exclusive Posture Chair models, and you immediately notice how the chair's contours help duplicate the body's natural standing position. Your hips are slightly forward, putting your spine in its strongest, most naturally comfortable position. Your rib cage is raised as though you were standing, giving your diaphragm unobstructed movement. Your body is held firm, but comfortable. It's difficult to slouch and easy to concentrate on mechanics and performance.
