

CAVEA™ FIXED AUDIENCE SEATING

Designed specifically for the K-12 education market

Wenger Corporation's prominence in the education and theatre equipment markets goes back over 75 years. Now, we've partnered with SERIES® Seating to engineer a new line of audience seating that specifically fits the needs of our K-12 education customers. We've combined industry-leading durability, comfort and an attractive price to create a seat that's exceptional in every way.

A Seat That's Exceptional In Every Way

- **Comfortable Design**

We took great care in designing a comfortable, ergonomic seat that doesn't sacrifice strength or durability.

- **Advanced Innovation**

Advanced Innovation - Cavea's gravity-rise seat makes it ultra-quiet. Two customized rubber bumpers embedded in the seat mechanism keep noise levels to a minimum. Specific cushion density and patented internal webbing creates ideal support and comfort for the duration of performances.

- **Affordable**

Our partnership with SERIES® Seating has led to an innovative design for the K-12 market that's functional, durable and optimized for cost effectiveness.

- **Durable and Low Maintenance**

The tubular steel inner seat structure will not bend, twist or deform. Plus, it has fewer bolts, screws and no springs. That means your maintenance staff will spend less time tightening, adjusting and fixing or replacing them.

We Even Rethought Installation & Maintenance

- **Easy Install**

Customers will appreciate the simplicity of installation. Cavea has fewer nuts, bolts and connectors which speeds up installation!

- **Fewer Parts/Repairs**

Innovative design with less nuts and bolts to be tightened, Cavea will be far easier to maintain and ultimately last longer.

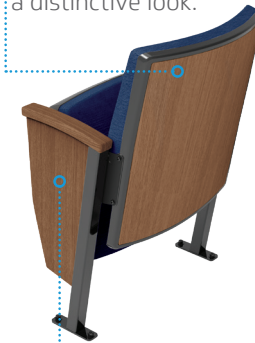

Enhanced Durability and Aesthetic

Enhanced Durability and Aesthetic - Back and seats with outer polypropylene covers and optional wood veneer inlay provide a variety of styling options. Reinforced polypropylene back and seat bottom offer long-term durability and easy cleaning.

Back and Seat Panels

Backs and seats are designed with a maintenance free and protective outer cover. Optional wood veneer inserts are available in a variety of stains to provide a distinctive look.

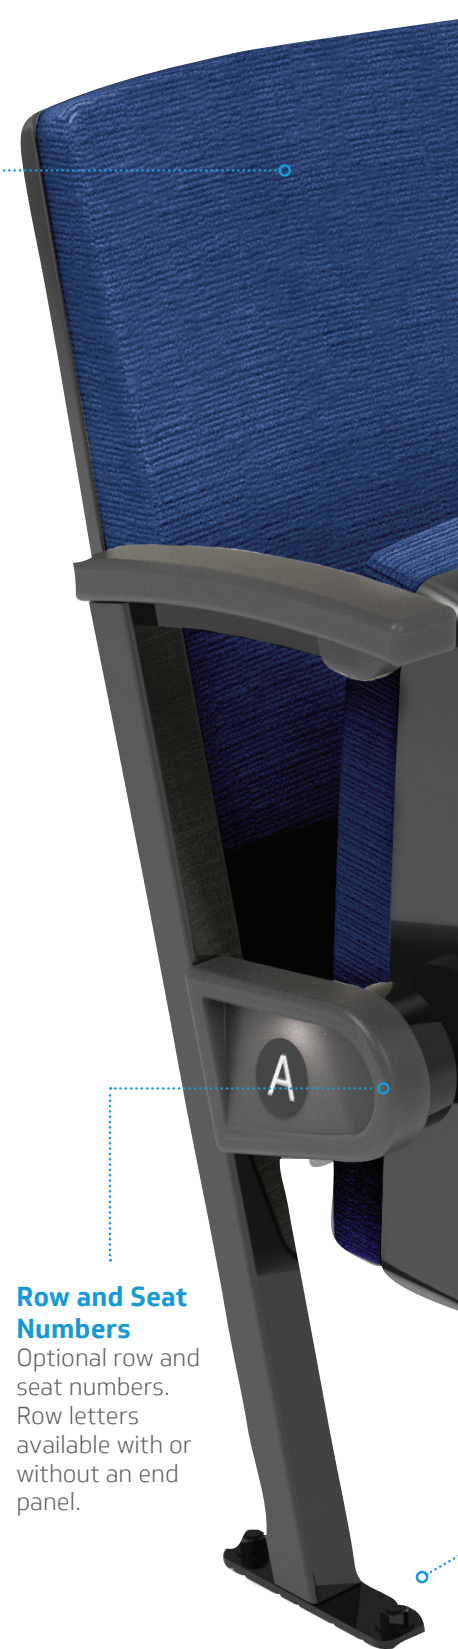

End Panels

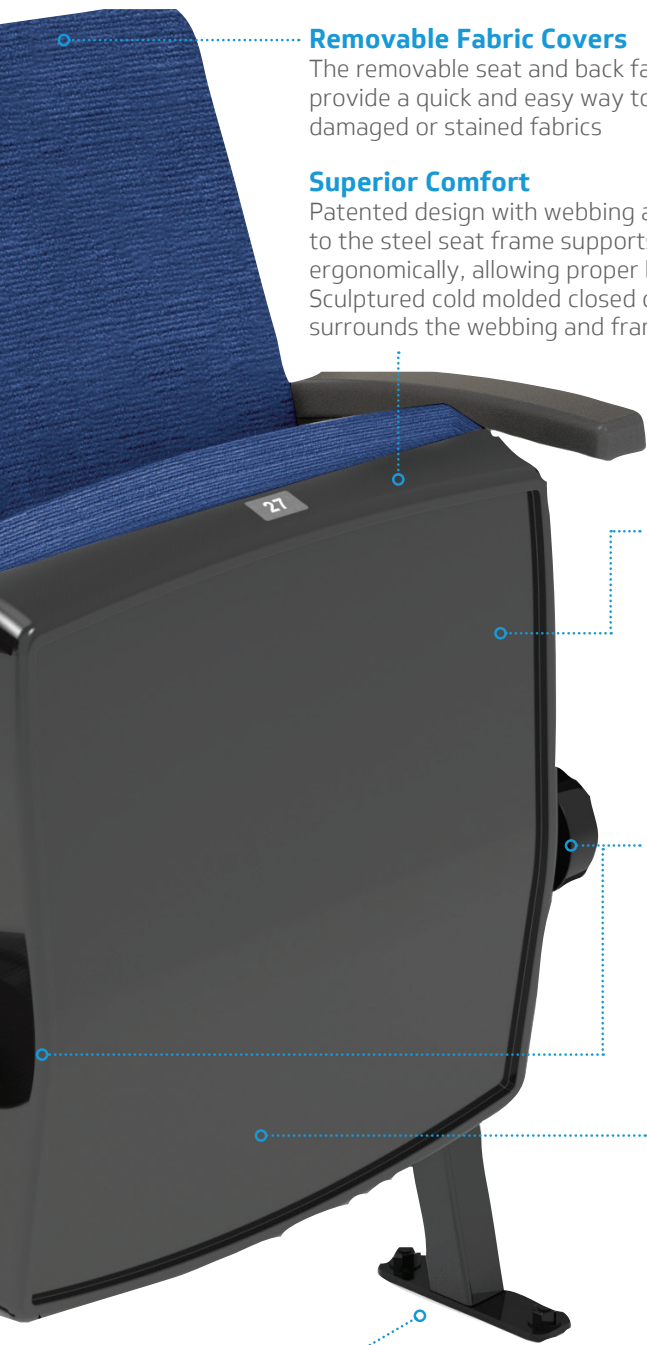

Seats are available with or without end panels to meet individual project needs.

Row and Seat Numbers

Optional row and seat numbers. Row letters available with or without an end panel.

CAVEA™ FIXED AUDIENCE SEATING

Removable Fabric Covers

The removable seat and back fabric covers provide a quick and easy way to replace damaged or stained fabrics

Superior Comfort

Patented design with webbing attached to the steel seat frame supports the user ergonomically, allowing proper blood flow. Sculptured cold molded closed cell foam fully surrounds the webbing and frame.

Heavy Lifter

Steel inner seat structure will support 600 lb of weight on the front edge of seat.

Seat Bracket

Fully enclosed aluminum seat mechanism with injection molded plastic cover eliminates potential pinch points.

Quiet Operation

Gravity-rise seat design. Two customized rubber bumpers embedded in the seat mechanism keeps noise level to a minimum.

Widths

Available in 19", 20", 21" and 22" widths.

Create the look you want

We make choosing the seating you want a snap. Mix and match wood, plastic, fabrics and accessories to create the perfect seating for your auditorium or performance space. Choose from a variety of seat widths, materials, fabrics, accents, aisle lighting and more.

We're your resource from start to finish

With Cavea Fixed Audience Seating you'll never need to coordinate multiple vendors, schedules and pricing to complete your project. We work seamlessly with your design team for product selection, site visits, layout, installation and after-sales support.

The look you want

Choose from a large palette of fabric colors and wood finishes!

CAVEA™ FIXED AUDIENCE SEATING

ERGONOMIC DESIGN:

The new Cavea seat was designed by experts in seating ergonomics for optimal comfort.

- Seat and back contours help position the occupant's body for proper posture and comfort
- Curvature of the armrest provides proper support and placement of occupant's arms and wrists

PRODUCT SPECIFICATIONS:

- Seat rise mechanism is a ¾ fold, noise dampening gravity rise system. It reduces noise and allows the seat bottom to be pushed back to allow more aisle space for people to pass
- Seat design with fully enclosed components eliminates any pinch points
- Having no exposed fasteners provides a clean look and reduces tampering with the seats
- "Drop-in" assembly reduces installation time and eliminates excess brackets and fasteners
- Compact seating envelope (16.75") maximizes seating capacity without compromising comfort
- 10-year warranty

CONFIGURABLE OPTIONS:

- **Seat widths:** 19", 20", 21", 22" maximize seating capacity and sightlines
- **Seat options:** Choose from polypropylene seat bottoms and backs for maximum durability or upgrade to real wood options for a distinctive look. Armrests are available in polyurethane or wood
- **Seat and back fabrics:** Hundreds of Wenger standard fabric options available or let us know your pre-selected option
- **Wood options:** Selection of stain choices available for upgraded wood options
- **End Panels:** Available with or without aisle end panels

OPTIONAL FEATURES & ACCESSORIES:

- Row, seat and donor plates
- Aisle lighting for safety and ambiance (beacon or under arm)
- Hundreds of fabric colors
- Selection of wood stain options
- Companion seating, ADA swing out panels and ADA tip up arm rest to ensure your venue is accessible and code compliant
- Additional options to meet your specific project needs
