# A COMPREHENSIVE LIGHTING SOLUTION

Wenger Corporation partners with premier lighting companies to provide comprehensive, innovative lighting, control and networking solutions for performance facilities. We function as a single point of contact for lighting integration services, project management, installation, commissioning, service and support, to ensure your lighting and control system needs are met and your expectations exceeded.

Each lighting solution is engineered to work seamlessly with our broad offering of manufactured performance products to ensure your venue shines in the lobby, on stage and behind the scenes.

## SIMPLY BRILLIANT

Wenger Corporation offers complete solutions in performance, architectural, utility, life safety, and emergency lighting and control products. Our lighting team works closely with your design team to carefully select products that will network together seamlessly for ease of installation, operation and control.

We understand the importance of one point of contact tying together complex, facility-wide lighting technologies for each project. Our array of partners and products allow us to provide you with cutting-edge, LED products and advanced control networks that will make your venue's lighting systems run with ease from the lobby to the house, stage, control booth, and support spaces.

Our team of lighting professionals is proud to offer 24/7 service and support for our integrated solutions. You only need one phone number to reach a lighting team member no matter the question, time of day, or issue. Our infrastructure allows us to support these integrated lighting solutions the same way we support all Wenger and J.R. Clancy manufactured products - with care and professionalism.

Dr. Phillips Center for the Performing Arts, Orlando, Florida

# COMPLETE LIGHTING PROJECT INTEGRATION

## APPLICATIONS ENGINEERING

To ensure an organized, efficient process, Wenger prepares comprehensive coordination drawings. In content and format, these documents are specifically generated to support installers and related trades. They also help minimize “scope gap” headaches and cost overruns. Detailed instructions anticipate – and eliminate – questions about connections to specific devices, nodes and ports. To maximize utility, affordability and seamless operation, Wenger lighting, controls and networking solutions perform with “open-standard”, widely adopted communication protocols.

## PROJECT MANAGEMENT

From the earliest stages, Wenger project managers oversee the entire scope of your lighting system, including on-site visits. Throughout the project, you have a single point of contact empowered to resolve issues and address questions on a timely basis. Along with providing technical support, Wenger product specialists also test the various elements to ensure they interact properly including architectural controls and houselight fixtures along with controls for audiovisual, building management and energy management. Our expertise and foresight help deliver a value-priced, risk-free and on-time solution. Safeguard this major investment by selecting a future-proof lighting system from Wenger – one that can evolve as your needs and equipment change.

## INSTALLATION

Our complete lighting installation services include expertise with low-voltage wiring and networking protocols. We also confirm that lighting is successfully integrated with other building systems and ensure compliance with relevant codes and standards, including ASHRAE-based energy-efficiency standards. With broad capabilities beyond lighting, Wenger can also coordinate installation of its other performance products including rigging, staging, acoustical shells and audience seating.

## TURN-ON, PROGRAMMING AND TRAINING

Wenger personnel work on-site with the project team, including construction manager, owner and end-user, to create a seamless solution ready to perform from day one and providing smooth, trouble-free operation. Thorough on-site training by Wenger personnel and support manuals for maintenance and operation help maximize the system's ongoing functionality and safety.

## CUSTOMER SUPPORT

After installation, when questions arise with any aspect of your lighting system, Wenger is your point of contact. We offer responsive 24/7 service and toll-free phone support from our in-house team members who are highly trained to troubleshoot the entire system – both remotely and on-site – to achieve a prompt, successful resolution. Customers also have the flexibility to contact our manufacturing partners directly.

## COMPLETE WARRANTY

Wenger Corporation offers a complete warranty and stands behind all of its installations, products and services as we have for over 75 years.

# INNOVATIVE POWER MANAGEMENT

Our new Stagelink™ platform is an innovative option for power management and offers more options for performing arts venues. By leveraging industry-standard motorized breaker technology and Distributed System Architecture (DSA), Stagelink reduces complexity, equipment and installation costs.

Already common in industrial applications, DSA solutions for lighting position power-management hardware near the fixtures being controlled rather than in remote equipment rooms. DSA minimizes the use of lighting conduit, load wire and terminations which can deliver significant cost savings compared to conventional centralized systems.

## ENERGY EFFICIENCY & CODE COMPLIANCE

We deliver effective, integrated lighting systems that provide our customers with high-quality, cost-effective and energy efficient performance spaces. Our focus on energy management allows our lighting team to assist with ASHRAE-based code language, sensing, metering and Building Management System (BMS) requirements that impact our customers. The result, an integrated lighting solution with LED technology and advanced control networks that enhance sustainability and reduce your costs, while improving the artistic and performance quality of your venue.

## POWERFUL PARTNERS

Wenger Corporation's performance lighting and controls partners lead the industry in innovation, creativity, exceptional products and support. Our partners give us the power to bring a comprehensive array of products, solutions and capability to every project, big or small. This process ensures the selected products for your project work together seamlessly to offer maximum flexibility, aesthetics and unparalleled quality.

## REMOTE LIGHTING SERVICE & SUPPORT

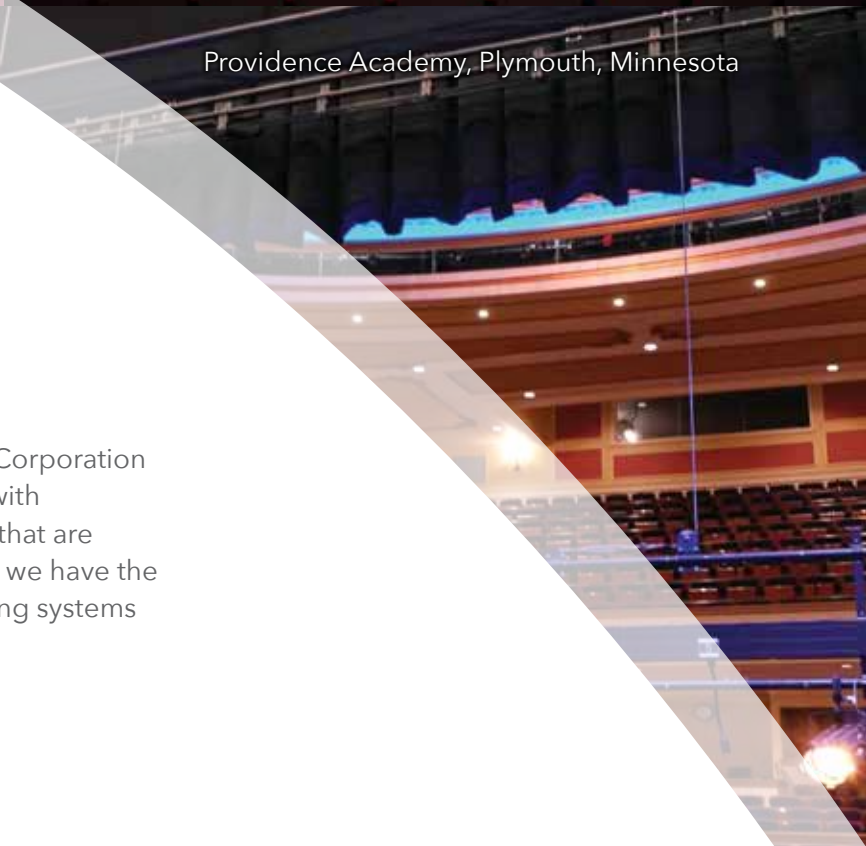

Modern performing arts venues use network-linked lighting fixtures and control. These systems need occasional maintenance, troubleshooting and upgrades. When it comes to troubleshooting and support, speed and responsiveness are critical. Remote Lighting Support is a service that allows our expert technicians to diagnose, update and modify your lighting system remotely, over a secure internet connection. When enabled, a Wenger Corporation technician can log into a venue's lighting system without the delay and expense associated with travel. When you consider the complexity of today's lighting systems, it is nice to know that expert analysis, diagnosis and consultation are just an internet connection away.

## LEGACY OF PERFORMANCE

For over 75 years, customers have trusted Wenger Corporation to support outstanding performances. We partner with innovative, high-quality and reliable manufacturers that are market leaders with proven track records. Together, we have the infrastructure and experience to execute your lighting systems reliably and cost-effectively.
