

STAGETEK® SEATED RISER SETS

CHORAL SEATED RISER SETS

Each StageTek Seated Riser Set Includes:

- Platform sections in elevations of 8", 16", 24" and 32" (203 mm, 406 mm, 619 mm and 812 mm)
- Pie-shaped sections of 8", 16", 24" and 32" (203 mm, 406 mm, 619 mm and 812 mm)
- Chair stops

Versatility

StageTek seated riser sets can be configured into a variety of shapes by adjusting the placement of the sections. Available shapes are:

- Horseshoe
- Winged
- Arc
- Semicircle

Custom StageTek Seated Riser Sets

Wenger Corporation offers standard seated riser sets that fit the needs of most groups. Custom designed riser sets are also available. Contact your Wenger Corporation representative for information on a design that will fit your needs.

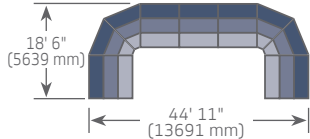

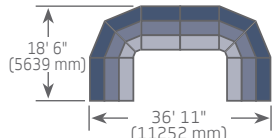

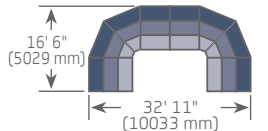

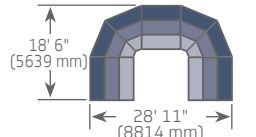

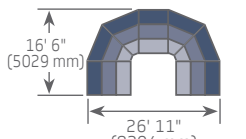

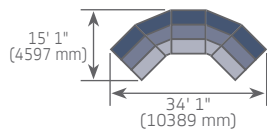

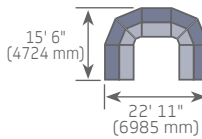

Accessories and ADA Compliance

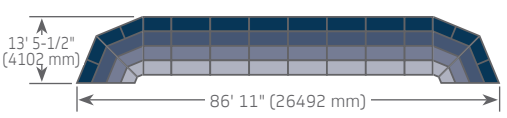

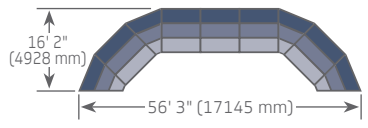

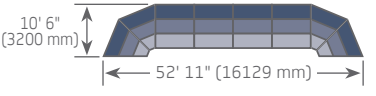

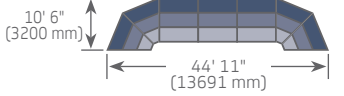

Adding accessories creates a finished, built-in look as well as easing safety, mobility and storage issues. Available accessories include:

- Front and side closure panels
- Guardrails
- Transport and storage carts
- ADA compliant ramp system

Contact your Wenger Corporation representative for information about these accessories.

RECTANGULAR BAND/ORCHESTRA SEATED RISER SETS

Maximize Space and Acoustics

Rectangular seated riser sets optimize the use of the space in your rehearsal room. By utilizing the corners of your rehearsal room, you have extra space for percussion and larger instruments. They look and function just like built-in risers, yet they can easily be moved or reconfigured as needed. And because they preserve the cubic volume of your room in the open space underneath, they don't have the negative impact on your room's acoustics that built-in risers do.

Each seated riser set includes:

- Platform sections in elevations of 8", 16", 24" and 32" (203 mm, 406 mm, 619 mm and 812 mm)
- Tri-corner filler pieces
- Chair stops
- Percussion extensions (optional) attach at the rear of the seated riser, adding depth at the 24" (610 mm) elevation to accommodate brass and percussion sections

Custom StageTek Seated Riser Sets

Wenger Corporation offers standard seated riser sets that fit the needs of most groups. Custom designed riser sets are also available. Contact your Wenger Corporation representative for information on a design that will fit your needs.

	8" (203 mm)

STAGETEK SEATED RISER SETS

The Benefits of Seated Risers

When students are all on one level they project their sound into the backs of the people in front of them. The sound loss can be significant and the critical listening ability of the students and director is diminished. Visual communication can also be affected when sight lines between the student and the director are blocked by instruments and people.

- StageTek seated risers are strong, durable additions to any music department
- Sound is projected over other musicians, improving aural cues and clarity of sound
- Sight lines between the director and students are unobstructed
- The cubic volume of the room is maintained in the critical reverberant space under the risers
- StageTek seat risers can be easily reconfigured, relocated and can be used to supplement a StageTek platform system

The Problem with Built-in Risers

Although built-in risers are common, they're not a good solution. Very few music rooms are large enough to sacrifice any of the room's volume but that is exactly what poured concrete risers do. By filling in so much area, they reduce the cubic volume of the room, creating a louder rehearsal space.

Built-in risers are also permanent. Once they are installed they can never be moved, reconfigured or set up in the auditorium – ever.

Keep your Options Open

StageTek platforms are more than seated risers. The individual units can easily rearrange to create platforms, swing choir sets and even small stages. You can also use separate seated riser decks to supplement additional StageTek platforms for larger production needs.
