

TRANSCEND ANY SPACE

Make the smallest room
sound like the **biggest venue**

 TRANSCEND

Wenger[®]
CORPORATION

TRANSCEND BREAKING DOWN ACOUSTIC BARRIERS

Transcend supports music educators, performers, and audiences by creating flexible, natural-sounding room acoustics that can **elevate any space.**

Transcend by Wenger represents over 30 years of dedicated research and development by our team of expert engineers with a deep passion for audio and acoustic technology. Designed to support musical development and encourage creativity, it is our hope that Transcend inspires the next generation of musicians around the world.

With the **push of a button**,
make a classroom sound like a cathedral or
transform a playhouse into an opera house.

Low ceilings, limited space, inadequate room shaping, and balconies —

Transcend breaks through physical barriers to great sound.

With our scalable technology, we've eliminated the economic barriers, too. You can now make a multi-purpose venue sound purpose-built for every performance.

Transcend by Wenger: **Small footprint, big sound**

The Wenger Advantage

Acoustical Performance – Much more than a “reverb effect”, Transcend simulates early-, mid-, and late-acoustic energy, with discrete control of reflected diffusivity, tone, direction, shape, and more... down to the subtle characteristics that make each performance venue unique.

Flexibility of Scale – With three unique digital signal processing formats to choose from, Transcend technology scales perfectly from music practice rooms for individual students to large event centers for thousands of people.

Music Education – Transcend was designed with musical skill development and education spaces in mind. This is why we have integrated features like instant record/playback, Bluetooth and other connected audio formats, and wireless control into every system.

Problem Solver – Poorly designed spaces for music are an unfortunate reality. Low ceilings and insufficient cubic volume lead to a lack of support and reverberation. Transcend can overcome these and other limitations by providing properly timed, balanced acoustic reflections – effectively moving the ceiling up to the height it should have been in the first place.

Professional Integration – Transcend integrates seamlessly into both new construction and existing facilities, blending into the architectural elements and connecting with other technologies. Expert design, installation, and commissioning services are available from Wenger Corporation.

TRANSCEND CLASSROOM

Practice where you perform, with custom acoustic presets of YOUR performance venues

At the push of a button

Get more than you thought was possible out of your ensemble and rehearsal spaces with Transcend Classroom. Transcend creates a truly flexible classroom, with ideal acoustics for everything from jazz to choral ensembles. Turn the classroom “off” while communicating important instructions or whenever you just need some peace and quiet.

Create high-quality recordings with the simple push of a button and teach more effectively with instant playback. Ideal for audition recordings, sectional work, and accelerating the learning process.

Perfect for:

- Music rehearsal rooms
- Large ensemble rooms
- Sound stages
- Black box theatres
- Cafetoriums
- Small performance spaces

Transcend Classroom brings the acoustics of your real performance spaces into your rehearsal environment, helping ensembles grow faster and **perform with confidence.**

9 unique preset acoustic environments

Improved active acoustic presets provide more natural reflections and reverberation of sound than ever before.

Accelerate development of tone, intonation, and other critical listening skills with Transcend Classroom.

Every Transcend Classroom System is custom designed and commissioned by expert Acoustic Technicians from Wenger.

Overcome poorly designed rehearsal rooms with inadequate ceiling height.

- Address loudness with wall absorbers and acoustic ceiling tiles.
- Reintroduce acoustic support with properly timed reflections and complete level control.

Transcend Classroom offers:

Touch Screen Control

New touch screen control panel and personalized settings menu, with wireless control options.

Connectivity

Connect seamlessly to other audio systems in the classroom.

High-Quality Recordings

Record instantly and manage audio tracks from the podium without dropping a beat.

Instantaneous Playback

Listen to recorded tracks and other connected audio in “immersive” or “stereo” mode.

Play From Your Phone

Connect to Transcend wirelessly via Bluetooth to play music directly from your personal device.

TRANSCEND STAGE

Create dynamic and clear sound on stage with active acoustic technology to **bring out the best in your performers**

Ideal for spaces where a traditional shell isn't an option

Transcend Stage provides the acoustic benefits of a traditional bandshell, without the storage, fly space, and weight capacity requirements of a full-stage system of movable towers and ceiling panels.

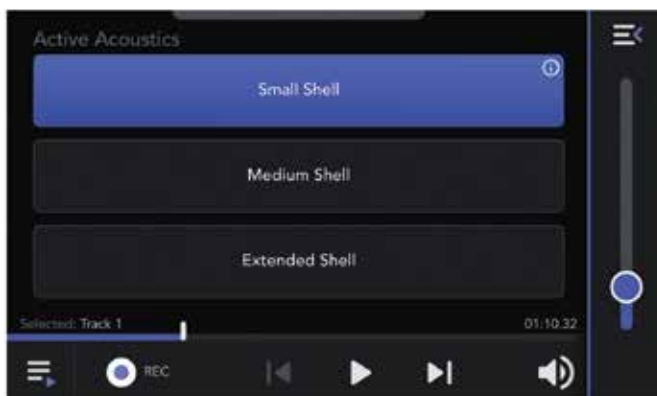

A series of speakers and microphones, suspended above the stage, provides the well-balanced, optimally blended, and perfectly timed acoustic reflections required for an ensemble to perform together and to project sound out to the audience.

Wenger brings together acoustic design expertise, precise installation, and hands-on commissioning to guarantee that every system performs at its highest potential. The result is a balanced, well-tuned environment tailored to your space.

Control made simple

Transcend Stage is operated through a clean, intuitive touchscreen that mounts neatly into an 8-by-11-inch wall box on stage.

- Customizable presets give directors a range of virtual shell options, from classic to expansive, far beyond what a physical shell can achieve.
- Bluetooth audio streaming, auxiliary inputs, and recording capability are all built-in.
- A lockable key switch provides secure power and configuration control at the panel.

“Transcend provides more sense of ensemble for the choir; each singer can hear everything. Wherever they are standing, each gets a complete audio story of all the parts around them.”

Amy Jo Cherner
Vocal Music Teacher
Eagan High School
Eagan, Minnesota

Smart, efficient system integration

All audio processing, networking, amplification, and power sequencing are housed in a compact, wall-mounted half-height rack. This streamlined design requires only a single 20-amp circuit, making installation straightforward. Placing the rack in the fly tower or an adjacent location keeps cable runs short and maintains a quiet, distraction-free stage environment.

Transcend Stage offers:

Rigging Ready, Zero Floor Space

Integrates directly into existing rigging with quick-release components and clean off-stage storage.

Integrated Features

Connect via Bluetooth, manage auxiliary inputs, and make high-quality recordings all from an intuitive, easy-to-use interface.

Versatile Acoustic Presets

Selectable shell settings with independent level control create unmatched acoustic flexibility on stage at the press of a button.

Instant Smart Calibration

Automated audio sweeps optimize the system for any stage setup in minutes.

Effortless Acoustic Power

Four overhead microphones and stage-mounted speakers deliver precise, blended reflections that elevate every performance.

TRANSCEND VENUE

Turn **any performance venue** into a true multi-purpose space

Provide clear and balanced sound to every seat in the house

Transcend Venue provides optimal acoustic support for any unamplified performance, at the push of a button. Advanced active acoustic technology delivers natural-sounding reflections and reverberation to every audience seat, for truly elevated performances.

With professional project management, turn-key installation options, and remote diagnostic support, Transcend Venue enables the right acoustics for every ensemble and every production.

Each system is backed by comprehensive design guidance and expert commissioning from Wenger, ensuring precise tuning and dependable performance.

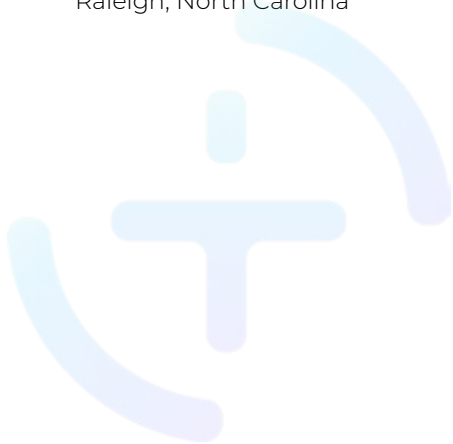

Transcend Venue delivers a reliable, future-ready solution **built to meet the evolving demands** of modern performance venues.

“The Transcend System has completely changed the sound and logistics of most of our performances due to the ease of setup for the performers and clarity of sound in the audience, no matter what seat you are in.”

Kennith Watts, Jr.

Assistant Technical Director & Audio Specialist
Stewart Theater
North Carolina State University
Raleigh, North Carolina

Transcend Venue offers:

Performance Guarantee

Each Transcend Venue system includes custom acoustic presets and is “tuned” by Wenger’s team of highly-experienced audio technicians.

Modern Network Architecture

BLU Link digital audio bus and HiQnet control allow for flexible integration with other installed audio systems and compatibility with most device manufacturers.

Turn-key Integration

Various packages available from Wenger, including full turn-key installation for existing facilities.

Advanced Matrix Audio Routing

Provides surround and spatial audio capability for immersive productions.

Peace of Mind

Remote diagnostic support is included with every Transcend Venue system to help with minor system adjustments and troubleshooting if and when it is needed.

TRANSCEND STUDIO

All of the amazing benefits of Transcend Technology in an affordable, easy-to-install package for small music spaces

Inspire your practice session

Give your practice rooms a new purpose and energy. Transcend Studio turns everyday practice rooms into the most coveted spaces in the music education suite – where students are inspired and motivated to practice.

Ideal for any small room

The Transcend Studio system is configurable for installation into any unamplified space of up to 500 square feet.

Perfect for:

- Music practice
- Small ensemble rooms
- Teaching offices
- Recording studios

Transcend Studio surrounds musicians with natural, supportive acoustics that **motivate better practice.**

What comes in the kit

- TS-1A processor
- Microphones with modern aesthetic and flexible installation options
- Touch screen control panel and personalized settings menu
- Two-way 5" speakers with adjustable mounting hardware
- Thin-format subwoofer with extended frequency response and high-quality music playback
- Convenient wall-mount brackets for easy and clean installation

Transcend Studio offers:

Bluetooth Connectivity

Connect wirelessly to play music directly from any personal device.

Automated System Calibration

Auto-calibration and auto-EQ mean no audio technician is required.

Retrofit Existing Spaces

Wire mold kit offered for spaces that cannot support through-wall cabling.

Recording & Storage

Record instantly and manage audio tracks with easy storage to USB-C flash drive.

Balanced Stereo Input

Integrate seamlessly with other audio sources that require a wired connection.

Backed by decades of acoustic expertise, Wenger is **redefining what's possible** in active acoustics. Transcend delivers a new level of clarity, versatility, and immersion, transforming any space into an exceptional performance environment. Connect with your Wenger representative to discover how Transcend can **elevate and inspire** every rehearsal and performance.
