

UPPER DECK AUDIENCE SEATING®

FEATURES AND BENEFITS

Wenger

Upper Deck Audience Seating System from Wenger is a strong and sturdy, safe and dependable system that's easy to set-up and store — and versatile enough to fit any need.

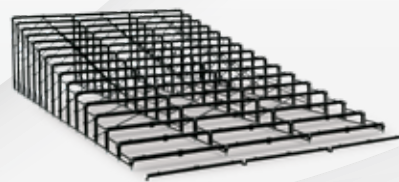

WENGER UPPER DECK AUDIENCE SEATING® PROVIDES:

- Fast and easy set-up by as few as two people.
- Components that connect quickly and securely without tools.
- A folding frame for convenient storage — doesn't need to be completely disassembled.
- A sturdy, quiet and safe structure that meets all applicable building code standards.
- All the advantages of permanent seating in a design that adapts to your changing needs.
- Multiple configurations for any application.
- Plenty of storage space underneath.

INTUITIVE DESIGN

Simple and easy to understand. Reduces assembly time. Any seating system can be set-up by two people - no climbing required.

WELDED STEEL CONSTRUCTION

Strong and durable, safe and dependable. Meets all building code standards for grandstand seating including guardrails and handrails. Exceeds vertical load requirement for movable seating of 100 lbs. per square foot (488.2 Kg/m²).

QUICK-RELEASE PIN SYSTEM AND INTERLOCKING COMPONENTS

Pins and locks are attached to frames eliminating loose parts and the need for tools. Both assembly and disassembly is simplified. Components are integrated to lock securely and dismantle quickly.

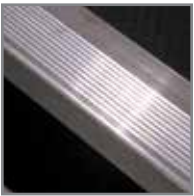

PRECISE LEVEL ADJUSTMENT

All columns feature individual level adjustment for solid support. Leveling feet turn easily to adjust up to 4" (102 mm) in height.

EASY DECK PLACEMENT

Decks are set into position with a convenient lowering tool that eliminates back strain while facilitating placement.

RELIABLE DECK CONSTRUCTION

Built with radiused edges to eliminate sharp corners. Finished with aluminum extrusions and integrated chair stops for added safety.

OPEN DESIGN AND SUPPORT STRUCTURE

Offers plenty of room underneath for storage and can be easily attached to a wall, if desired. Provides versatility because it can be configured in a variety of rows and elevations.

FIELD REPAIRABLE

Easy to repair or replace because components are simple and readily available. All interlocking components are constructed with standard fasteners.

FOLDING FRAME

Support Frame folds so it doesn't have to be completely disassembled for storage. Stores in a variety of configurations, from separate individual components to large sub-assemblies for fast set-up. You choose the level of assembly that works best for your situation.

INDIVIDUAL MOVE AND STORE CARTS

Simplifies installation and makes storage of components more convenient. Carts are specifically designed for each component - decks, columns, endframes, trusses and rails.

OPTIONAL WHEEL SYSTEM

Neoprene wheels and fabricated steel wheel mount construction enables smooth movement of the entire support structure for relocation.

OPTIONAL POWER LEVELING SYSTEM

Fabricated steel gear drive construction that allows for quick and easy leveling of the frame assembly with a drillmounted attachment. Also provides a convenient way to lower the frame assembly onto the wheel system. Power leveling is not provided with the required power drill.
