MANUFACTURER

The Wardrobe Cabinet is manufactured by:

Wenger Corporation
555 Park Drive
Owatonna, MN 55060
1-800-4WENGER (493-6437) • 1-507-455-4100
www.wengercorp.com

INTENDED USE

- This product is intended for indoor use in normal ambient temperature and humidity conditions — it must not be exposed to prolonged outside weather conditions.
- This product is intended to be assembled and used only as described in these instructions.

WARRANTY

This product is guaranteed free of defects in materials and workmanship for ten full years from date of shipment. A full warranty statement is available upon request.

BEFORE YOU BEGIN

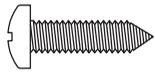

- Read the complete assembly procedure before you begin.
- The Wardrobe Cabinet is shipped almost entirely assembled.
To install, level the cabinet and attach the few remaining components as outlined in these instructions.
- Remove all items from the shipping carton and lay them out approximately in their final position.
- Remove all items from the hardware bag and determine where all of the fasteners will be used.

REQUIRED TOOLS

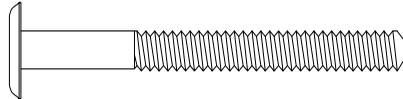

The following tools must be available to assemble the Wardrobe Cabinet:

- Carpenter's Level
- Carpenter's Square
- Plastic Mallet
- Variable Speed Drill (to drive hex socket screws)
- 4mm Hex Drive for Drill

FASTENER PARTS LIST

Screw, SM, PPHD,
ZP, #8 x 5/8"

Screw, Mach, 1/4-20 x 1.77"

Shelf Support

Screw Insert,
1/4-20 x 5/8"

Note: Hardware Pack may contain extra fasteners.

LEVELING THE CABINETS

NOTE: Do not try to level the cabinets to match soffits.

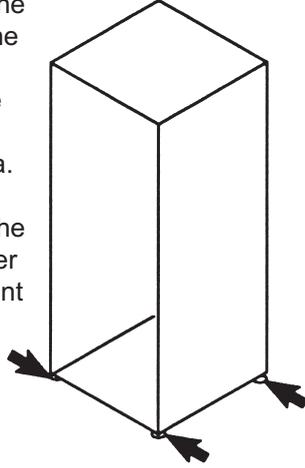

NOTE: Do not try to plumb the cabinet to match adjacent walls.

NOTE: For proper door alignment, follow these instructions carefully.

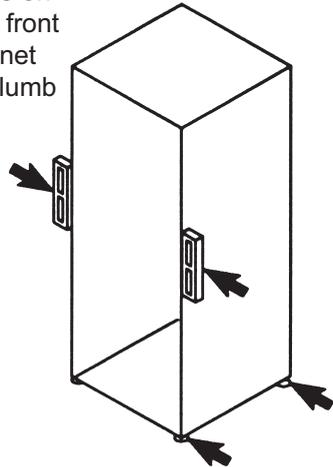

NOTE: To access the levelers, the file drawers must be removed first.

See "File Drawer Removal" before leveling the cabinet.

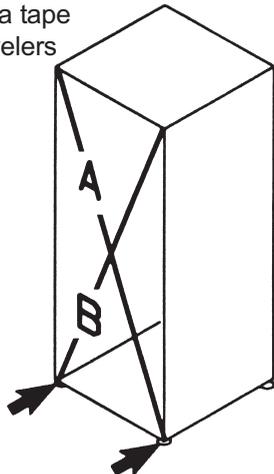

1. Check the level of the entire floor where the cabinets will be installed. Determine the highest point of the floor in that area. Extend all levelers until the bottom of the cabinet will be higher than the highest point in the floor.

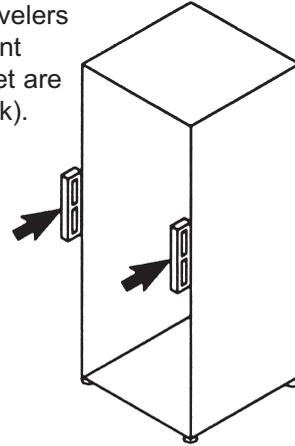

2. Adjust the levelers on one side until the front edges of the cabinet side panels are plumb (side-to-side).

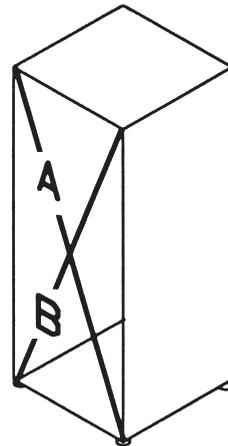

3. Measure A and B with a tape and adjust the front levelers until $A=B$ ($+1/32$ inch).

4. Adjust both front levelers equally until the front edges of the cabinet are plumb (front-to-back).

5. Recheck that $A=B$. Readjust if necessary (repeat steps 2-4).

If additional cabinets will be installed:

6. Adjust the levelers on the next cabinet so it will line up with the top of the first cabinet.
7. Repeat steps 2-5 for the second cabinet.
8. Continue in the same manner until all cabinets are leveled.

SECURING THE CABINET(S) TO THE WALL

⚠ CAUTION
Cabinets are unsafe unless secured as specified.

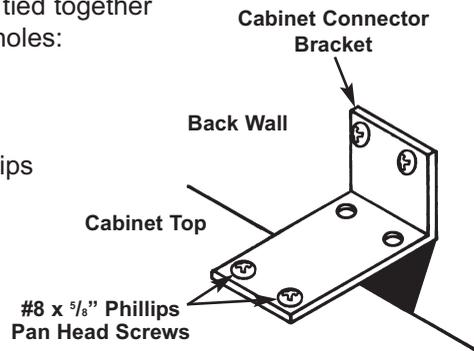

⚠ CAUTION
Use methods appropriate to your wall surface.

NOTE: The following instructions are for standard installations.
For seismic installation instructions, see 145R422.

There are Cabinet Connector Brackets in the hardware bag for securing the cabinets to the wall surface. Because of the variety of possible wall surfaces, fasteners for attaching the brackets to the wall are not included. Have your maintenance people recommend an appropriate type for safe, secure attachment.

NOTE: Make sure all of the cabinets are secured together before attaching them to the back wall.

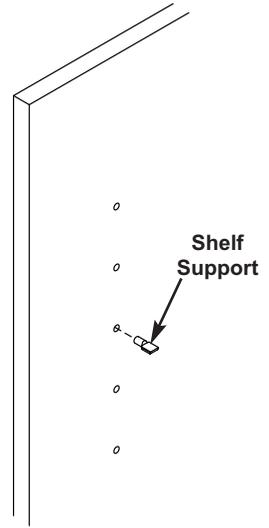

1. Using the Cabinet Connector Brackets, the cabinets can be tied together and to the wall surface at the top. The brackets have extra holes: if the cabinets cannot be positioned tight against the wall, the bracket can be slid back as much as 2" until it is tight against the wall surface. Attach the bracket to the cabinet top using two #8 x $\frac{5}{8}$ " Phillips Pan Head Screws.

2. Use the necessary fasteners suggested by your maintenance people to secure the cabinets to the wall.

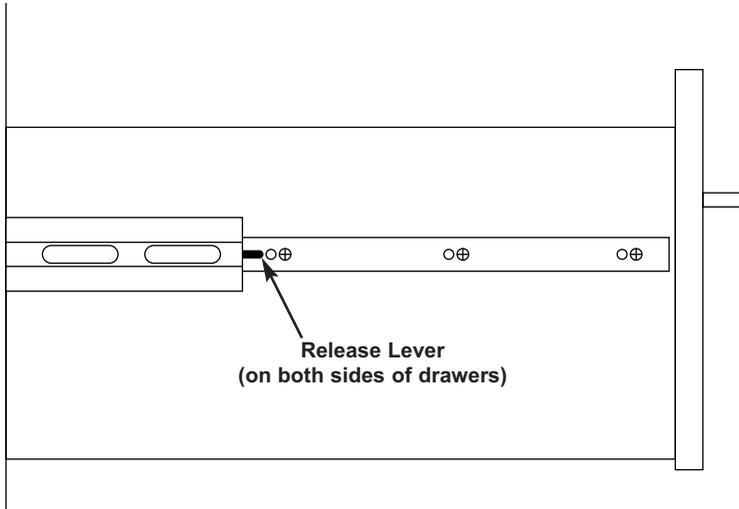

INSTALLING THE SHELVES

1. Position the Shelf Supports at the desired shelf heights.
The flat edge of the Shelf Support should face up, to match the slots in the bottom of the shelf.
2. Install the shelves.
3. The larger shelf uses six Shelf Supports and is to be placed at the bottom of the left side of the cabinet.

FILE DRAWER REMOVAL

1. Extend the file drawers so that the Release Levers are visible.
Slide the Release Levers either up or down and the file drawers can be removed by pulling outward.
Now the cabinet can be leveled according to "Leveling the Cabinets".
2. Re-install the file drawers by aligning the rails that are attached to the file drawer with the rails that are attached to the cabinet.
Slide the drawer back until the Release Lever snaps into position.
