

INTRODUCING

TRANSCEND™ Active Acoustic System

One Space. Any Performance. Simply A Sound Investment.™

Wenger®

Clarity

Natural reflections. Transcend™ Active Acoustic System enhances the reflections of the space providing optimal acoustics for any performance or event.

Dynamic

Advanced design. A dedicated, state of the art processor for active acoustics using high speed digital audio communications with Lexicon® technology to bring the most out of every performance.

Transport

Technology transforms. From choral and symphonic to drama and lecture, Transcend™ Active Acoustic System can optimize the space for each performance.

Connect

Command and control. The entire system can be managed with remote control and visual monitoring using state of the art Audio Architect software.

Simply a Sound Investment.™

Enhance the acoustics of your performance space - now at an affordable price. Transcend™ Active Acoustic System gives you the control to perfect your sound environment in virtually any space: performing arts centers, auditoriums, theatres, opera houses, arenas and worship spaces.

With new advanced state of the art Lexicon® active acoustic technology, Transcend stands above. Our processor is designed specifically for active acoustics. For a reliable and affordable system that is easy to operate, Transcend is simply a sound investment.

Transcend the ordinary, inspire performers and connect with audiences like never before. Contact us today: transcend@wengercorp.com.
